

SG-227ea Clean Agent Fire Extinguishing System

Today's Sustainable Clean Agent Solution

The SG-227ea Clean Agent Fire Suppression utilizes the HFC-227ea extinguishing medium. HFC-227ea is a colorless and odorless agent that leaves no residue, perfectly suited to protect high value assets in area that may be normally occupied, in locations where clean-up of other agent is problematic, when storage space for a fire suppression agent is restricted, or when an electrically non-conductive agent is required.

The HFC-227ea agent is stored in cylinder assemblies designed specifically for the application and charged to a fill density of 0.5kg/L to 1kg/L. Available with 25 bar, 42 bar and 50 bar, and come with a wide range of cylinder sizes options.

- **FAST ACTION**
Designed to discharge in 10 seconds upon activation, thus less time for fire to grow or damage.
- **CLEAN**
Discharge as a gas reading into all protected facility leaving NO residue to damage sensitive equipment or costly clean ups.
- **PEOPLE-SAFE**
One of the safest clean agent available that is suitable for occupied areas.
- **ENVIRONMENTAL FRIENDLY**
Zero Ozone Depletion Potential (ODP), short atmospheric life time.
- **TRUSTED CHOICE**
HFC-227ea is one of the most trusted agent for fire extinguishing systems.
